CAN I PLAY IT?

Estimating piano performance difficulty using multiple modalities.

CAN I PLAY IT?

Estimating piano performance difficulty using **multiple modalities.**

<note> <pitch> <step> G </step> <octave> 4 </octave> </pitch><duration> 1 </duration> <voice> 1 </voice><type> quarter </type> <stem> up </stem> <staff> 1 </staff> </note> <note> <pitch><step> F </step> <octave> 4 </octave> </pitch> <duration> 1 </duration> <voice> 1 </voice><type> quarter </type> <stem> up </stem> <staff> 1 </staff> </note> <note> <pitch> <step> E </step> <octave> 4 .....

Symbolic Score encoding

- Béla Bartók's *Mikrokosmos* Sz. 107 is a collection of progressive difficulty pieces
- It is progressively ordered (Bartók and Henle rankings). It can be grouped in 3 clases

- Beginner (B. 1 & 2)

2. Symbolic: A more real dataset

Table 1. Comparison between MKD and CIPI, showing the number of composers, levels, pieces, notes, and measures in both datasets.

	MKD	CIPI
No. composers	1	29
No. levels	3	9
No. pieces	147	652
No. notes	42699	1672699
No. measures	5041	115523

3. PDF Data Collections

Dataset	MK	CIPI	PS	FS	HV
Pieces	147	652	2816	4193	17

- **5** datasets: **7,500+** scores across 9 difficulty levels.
- Mikrokosmos (MK) and Can I play it? (CIPI): derived from **symbolic** data.
- PianoStreet (PS) & Freescores (FS): **Crowdsourced**
- Hidden voices (HV): spotlight on **black women** composers.

P. Ramoneda, J. J. Valero-Mas, D. Jeong and X. Serra (2023). Predicting performance difficulty from piano sheet music images . In Proc. of the 24th Int. Society for Music Information Retrieval Conf., Milan, Italy.

4. Audio Data Collections

TABLE I
STASTISTICS OF THE DATASETS AVAILABLE FOR ESTIMATING PIANO PERFORMANCE DIFFICULTY.

Dataset	Pieces	Classes	AIR	Noteheads	Composers
Symbolic data					
MK [13]	147	147	.78	49.2k	1
CIPI [14]	652	9	.33	1.1M	29
Image sheets					
PS [25]	2816	9	.24	7.2M	92
FS [25]	4193	5	.37	5.8M	747
HV [25]	17	4	1	21.5k	10
Audio recordings					
PSyllabus	7901	11	1.02	1.1M	1233

5. Improving Automatic Piano Fingering

Partial annotation

Fully annotation

We introduce a novel dataset for the task, the ThumbSet dataset, containing 2523 pieces with partial annotations of piano fingering crowdsourced from non-expert annotators.

	ThumbSet Statistics		
	LH	RH	total
n pieces	2370	1781	2523
n windows	70613	108124	178737
ave length of window	43	44	44
prop of annotated notes	52%	52%	52%

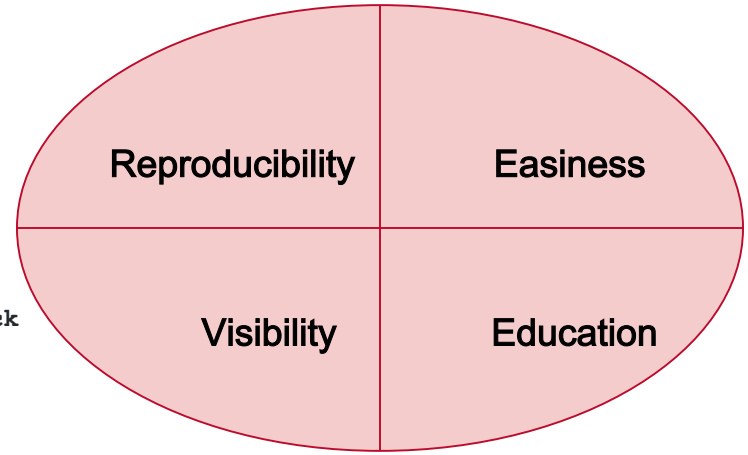
Mirdata

https://github.com/mir-dataset-loaders/mirdata

```
import mirdata

orchset = mirdata.initialize('orchset')
orchset.download()  # download the dataset
orchset.validate()  # validate that all the expected files are there
example_track = orchset.choice_track()  # choose a random example track
  print(example_track)  # see the available data
```



Demos

Demo of the paper P. Ramoneda, J. J. Valero-Mas, D. Jeong & X. Serra, Predicting performance difficulty from piano sheet music images, in Proc. of the 24th Int. Society for Music Information Retrieval Conf., Milan, Italy (2023).

Code | Paper | Dataset

This demo will predict the difficulty of a piano piece based on music sheet images. The outputs are performance difficulty levels estimated from 3 public datasets: CIPI (9 levels), PS (9 levels), and FS (5 levels). Further information can be found in the paper.
